Further to your request for information dated 27 February 2015 relating to the provision of audiology services

We have searched our records and taken all reasonable steps to locate the information requested but have not been able to do so. We are unable to access the level of information you have specifically required from the data that we hold. The CCG commissions an audiology service from two providers, Medway Foundation Trust and Kent Community Health Trust. However they do not invoice us on a cost per case basis so we do not have data for the exact number of hearing aids that have been supplied. So far as we are able to determine, the Clinical Commissioning Group does not hold the information requested.
